

GreyCampus

Enhancing Productivity with Custom Training Solutions

www.greycampus.com

Introduction

GreyCampus Edutech Pvt Ltd, established in 2014, is a global upskilling platform that builds productive talent for the industry through customised, structured and rigorous training solutions. We focus on effectively mobilizing skills, resources, and knowledge to produce skilled workforce who can stand out in the hyper-competitive tech sector.

We invest into technology to optimise the use of innovative learning aids, study plans, course progress markers and other impactful teaching techniques.

Training programs are delivered across different skill areas including data analytics, software engineering, quality management, project management, essential workplace behavioural skills, leadership training and more.

- Complete **operational support** and monitoring during training
- **Assessments and performance** reports to analyse learning outcomes
- Capability to deliver trainings **pan-India and globally**
- A large pool of **qualified and experienced instructors**

Niraj Gupta
Technical Recruiter, Human Resource, Cotiviti

"My appreciation to GreyCampus for the effort put into training the candidates for roles in our company, hence assuring quick TAT. The team was prompt in responding with the course curriculum and other details requested. I thank the team for continuous assistance and follow-up throughout the process. I wish to have a fruitful association going forward as well!"

How We Work

Step 1

Need Analysis

We work with you and employ different methodologies to analyse and establish the training needs

Step 2

Customisation

Our subject matter experts work with your technical team to custom build training programs and implementation structures

Step 3

Delivery

Experts are deployed to implement the training. Complete operational support is provided during the execution of the program

Step 4

Assessments and Reports

Assessments, in multiple variants, are built into every training program. Progress reports are shared regularly with the client.
